

PENBERTHY application report

Section 2000
Application Report 2784
Issued 05/05
Replaces 10/04

For: OFFSHORE GAGES AND GAGECOCK ASSEMBLY OPTIONS

Frequently, offshore gages are ordered with no accompanying gagecocks. These applications either do not require gagecocks or the standard prepared gagecocks are acceptable. Three possible options can be considered when applying Penberthy gages and gagecocks to offshore applications. The following table illustrates these points.

GAGE
PREPARED PER
OFFSHORE
APPLICATION
REPORT 2600

GAGECOCK OPTION		GAGECOCK OPTION DESCRIPTION
#1	Painted but not per Offshore Application Report 2600	GAGECOCKS NOT ASSEMBLED TO GAGE AT FACTORY standard gagecocks boxed separately - no additional cost for gagecocks - standard gagecock part number
#2		GAGECOCKS ASSEMBLED TO GAGE AT FACTORY standard gagecocks oversprayed after assembly with last two coats - no additional cost for gagecocks - standard gagecock part number - special assembly part number
#3	Painted per Offshore Application Report 2600	GAGECOCKS ASSEMBLED TO GAGE AT FACTORY gagecock and nipple surface preparation and coating per Offshore Application Report 2600 - price addition to gagecocks for offshore preparation - offshore gagecock part number
