For: RECOMMENDED PRACTICE FOR LONG TERM STORAGE

---

### **Recommended Practice for Long Term Storage of Penberthy Products**

- 1. Inspect protective coating (if applied) for chipping or holidays. Repair before proceeding.**
- 2. Seal the product in not less than 10 mil [0.25mm] polyethylene (PE) wrapping packaged with desiccant (silica gel preferred, at least 2 oz [57g] / cu ft [0.03 m<sup>3</sup>]).**
- 3. Store PE wrapped product in protective containment such that the product is not subjected to shock, bumps, top loads, etc.**
- 4. Store within the temperature extremes of the nameplate or specification documents - do not expose to direct sunlight or other UV sources**
- 5. For gage columns in excess of 18" [0.45m] long store vertically. If horizontal storage is necessary, support the entire length of the column (support intervals not to exceed 10" [0.25m]).**
- 6. If an elastomeric material is part of the product - replace it before use if storage time exceeds 24 months.**
- 7. At installation it is essential to follow the instructions in the individual product Installation, Operation and Maintenance Manual.**
