

# Penberthy Jet Pumps Soar...

## ...In thousands of pumping, mixing and heating applications.

### Leadership... in applications.

With an application range almost as limitless as the imagination, it's no wonder so many companies in process industries use Penberthy Jet Pumps – for everything from pumping liquids and slurries, moving granular solids, draining sumps and evacuating vessels... to heating liquids or agitating them in tanks... to mixing a second liquid into a flowing pipeline.

*And many more uses!*

### Leadership... in value.

In every case, Penberthy Jet Pumps are doing the job better and more reliably than more complex – and costly conventional pumping and mixing systems. The design is remarkably simple – no moving parts that require no lubrication and little maintenance with easy installation.

Jet Educator/Injector/Ejector Technology

### Leadership... in service.

We've been leading the industry for over 100 years. We have the application expertise and manufacturing capability to solve even your toughest process problems

with quality products. With JIT manufacturing, foundry & fabrication facilities, and extensive distribution network, you'll get the product and support you need – when you need it. Need a few more reasons to buy Penberthy Jets?

*Then call us today!*
